

Maestro™

from Faria Marine Instruments

Faria® has developed the first true “marine computer system” designed to meet the demanding requirements of the recreational boater. The Maestro™ system consists of a powerful, compact, sealed, fan-less CPU, a high resolution TFT daylight readable touch-screen and is powered by Faria’s new navigation software suite.

Features:

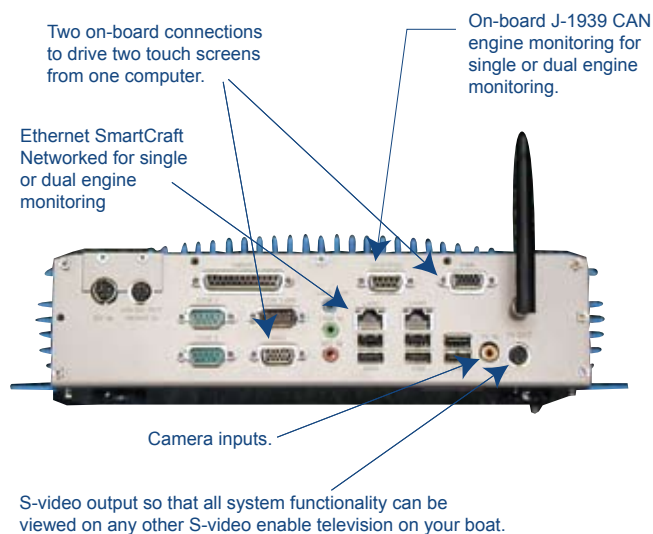

- Color Radar
- 3D Fish Finder & Sonar
- Chart Plotter
- Advanced Navigation and Nav Photos
- Satellite Communications
- Weather
- Multiple Camera displays
- Complete US charts
- Coastal Topo Maps
- Contour 3D Charts

With the Maestro™ system on-board the boat owner does not have to waste hours of valuable time studying the complex manuals required to operate conventional chart plotters, radars and fish finders.

The Maestro’s™ intuitive features and touch screen display provide the boat owner with an out-of-the-box easy to operate system. The Maestro™ eliminates the confusing buttons, keys or dials found on typical navigation systems. Instead, the boat owner with just a touch of a finger can view and change charts, create routes, see high resolution navigation photos, get tide charts, drop-in radar overlays, control the auto pilot and much more.

The Maestro™ offers a touch-screen display for virtually any size boat. Available with an 8.4”, 12.1”, and 15” screen.

All Faria Marine Instruments comes with a Limited Lifetime Warranty see www.faria-instruments.com for details.
