from Faria Performance Instruments

Faria Bus Gauges

The easy to read analog pointers are driven using a digital stepper motor technology for accuracy.

Driven by J1939 Faria® CAN InfoCenter via proprietary Faria® bus.

Any data carried on the J1939 CAN bus can be displayed even electric motor and generator data.

Conserves panel geography. All gauges mount in standard hole sizes. (2.063", 3.375", 4.375")

Available with Faria® vibration resistant spin-on back clamps.

Water resistant Packard connectors used on all electrical connections.

Face of gauge is waterproof.

Custom graphics available. Available in all Faria® Standard Styles

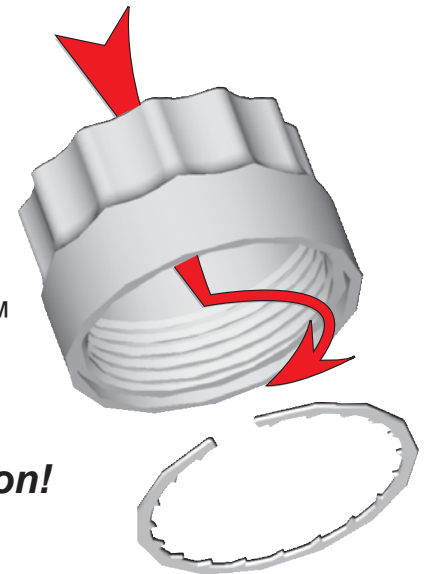

Other gauges available

- Voltage
- Amperes
- Fuel Level
- Engine RPM

with quick,
Twist and Go™
technology...

Easy Installation!
