

**Service Bulletin**

**Issue:** Program updates for NMEA2000 MG3000 instruments.

**Notice:** Faria Beede is updating the programs on MG3000 NMEA 2000 instruments. The changes update base code to the 2015 branch, adds Engine Hours to Line 2 of the display, and adds Faria Bus 3 protocol support. Also added is control for Analog lighting and a Yanmar engine menu.

This update removes the Cummins engine menu, but adds support for Evinrude G1 and G2 with full proprietary fault codes.

The following programs are affected;

1. PGF399, revise to D
2. PGF474, revise to D
3. PGF405, revise to D
4. PGF519, revise to A2
5. PGF490 (obsoleted and replaced with PGF399 revised to A)

**Resolution:** This update will be a running change and should not affect current customers. A running change occurs when new parts are manufactured and sold.

This notice is to inform current users of the MG3000 with the above programs installed that this change is occurring.

This change is controlled under ECN 10337.

For additional information or you have any questions regarding this, please call Faria Customer Service at 1-800-473-2742 for assistance.
